

North Ridge

North Reading, MA

Northridge, North Reading is located on 18 acres of previously undeveloped land, using only 5 acres for the homes. This 66-unit development is the first active adult community in the North Reading area and each building contains from 6 to 10 units. Hassle free, maintenance free, sense of community – these are the major selling points that has made this active adult community such a sought after location to settle into.

The target audience is adults above the age of 55. The design was created to give the neighborhood feel but also offered plenty of space to those who may have been downsizing. The open floor plans offer every individual ample space to entertain or just to spread out. There is a clubhouse located onsite for use by residents for entertaining or social activities.
