

Watertown Ford, Watertown, MA Car Showroom and Sales Offices

This unique automobile showroom is built on a site that was once traveled by the local railroad. Zoning restricted the building to be only 18 feet wide and sitting on a highly traveled road in Watertown, this project presented some interesting obstacles. The design and construction had to be creative in order to utilize the length and narrow depth of the site as well as complying with the standards of Ford dealerships.

This dramatic 2-story structure with large windows, eye catching interior lighting and clean exterior lines attracts many customers from nearby Watertown as well as individuals that pass by. This 2 level structure houses a show room and sales offices and opened June 2003.
